Subject:	Infrastructure Transition & GO54 Renewal Management

As part of my transition out of managing your website infrastructure, I have successfully migrated your website hosting and domain management to a dedicated, independent account under your direct ownership. Moving forward, your internal team will have exclusive access and full responsibility for handling platform updates and timely service renewals.

Please use this guide to secure your access credentials and manage your ongoing subscription renewals directly.

1. Account Access Credentials

GO54 Portal Access Details

Hosting Provider: GO54 (Formerly Whogohost) – www.go54.com

Account Email: [Insert the new assigned Gmail here]

Temporary Password: [Insert temporary password here]

CRITICAL NEXT STEP: For absolute security and data privacy, please log in immediately using the temporary credentials above and change the password to a secure phrase known only to your authorized internal team.

2. Step-by-Step Renewal Guide

To prevent website downtime or domain suspension, use the following procedure to settle open invoices directly through your GO54 dashboard:

STEP 1 Access the Portal

Navigate to **go54.com**, click on the **Login** button at the top right, and input your assigned Gmail address and current password.

STEP 2 Locate the Renewals Area

Once logged into the main client dashboard, look at the sidebar menu on the left side of your screen. Click on **Accounts**, and select **Renewals** from the resulting dropdown options.

STEP 3 Select Services for Renewal

The Renewals page will list your active assets grouped by category (such as *Hosting* or *Domain*). Identify the service approaching its expiration date and click the **Renew** button next to it.

STEP 4 Review the Invoiced Items

An **Add to Cart** prompt will appear to confirm your action. Review the selection and accept. The system will automatically construct the digital invoice and forward you directly to the billing summary view.

STEP 5 Complete Payment Execution

Click the **Pay Now** button on your active invoice screen. Choose your preferred payment method (e.g., Credit/Debit Card, Bank Transfer, or USSD) via the secure payment gateway to finish the transaction. Your subscription will extend immediately upon successful confirmation.

3. Critical Management Tips

- **Monitor Email Alerts:** GO54 sends automated renewal notifications to your newly assigned Gmail account at 30-day, 14-day, and 7-day intervals prior to expiration. Ensure this inbox is systematically monitored.
- **Prevent Expiration Gaps:** If a domain or hosting plan crosses its expiration date, your public website and any associated custom corporate email accounts will become immediately unavailable. It is best practice to process payments at least one week in advance.
- **Support Escalation:** If you face payment validation failures, invoice discrepancies, or login blockages, use the live web chat directly on GO54's platform or contact their technical billing desk at **billing@go54.com**.
